CD-INTERACTIVE

PHILIPS

© Philips Consumer Electronics Company
A Division of North American Philips Corporation

Current software categories include "Children's," "Music," "Games," and "Special Interest." The future of CD-I software will be as varied and limitless as your imagination.

Philips-Interactiva Modula (PIM), a Philips-Polygram corporation, is the world's leading developer of CD-I titles. Working with renowned publishing groups including Rand McNally and Time-Life, and entertainment companies like Children's Television Workshop, PIM has developed, and is continuing to

develop, a broad range of educational, informational and entertainment titles. To illustrate the broad span of CD-I disc availability, current selections include such varied topics as "Treasures Of The Smithsonian," "A Year In Science Class," a special CD-I "Pakistani Series," "ABC Sports

Golf," "Circus Jubilee," "Time-Life Photography," "Cancer's World Of Gumbo," "Children's Musical Theatre," and "Sandy's Circus Adventure." To name just a few. A complete list is available from your retailer.

Philips CD-i910 - Compact Disc Interactive with Remote Thumbstick

Philips CD-i910 receiver is easily be programmed using entertainment components

By joining the first in the world to experience the excitement of a revolutionary dimension in multi-media interactive education, information and entertainment - Compact Disc-Interactive - a truly new concept that finally gives complete control of your television and audio-visual world where it belongs. In your own hand!

CD-Interactive truly brings you the world on a disc - giving you the ability to control the information entertainment you receive, determine the sequence of presentation, set questions and get immediate answers. With CD-i you don't just read about events, places or a guidebook - you actually explore the sights and sounds in your own personal Shogun-La.

Television becomes thought-provoking for the whole family

You don't just read about taking a car photograph, the interactive capabilities of CD-i let you participate right on your TV screen. And children can visit "Sesame Street" and other pre-scheduled pleasure spots at their whim. Learning made being entertained. And retaining what they've learned through the engaging and flexible teaching advantages that interactive participation offers.

CD-i connects quickly and easily to just television receiver and home stereo system - you have no optional accessories or adapters to buy. Your computer, CD-i

is "user-friendly" in operation. The unique remote has been designed to fit comfortably into one hand and the thumbstick and action key - the so-called controls for interacting with the interactive program are easy, one-hand operation.

The present and future applications of CD-Interactive are unlimited. In the future, you can have your favorite family photos transferred to compact disc for viewing on your home TV.

THE WORLD ON A DISC
